Create lasting memories this winter

Supreme Sports Chicago is the Premier Ice Rink Builder in the Chicagoland area. Owner Joe Hiltz has built thousands of residential and commercial ice rinks since 1992. Supreme Sports specializes in customizing a rink to fit your yard and your families budget. Here are some of the most frequently asked questions.

Q: What is the cost?

A: Average costs range from \$1,250 for a 20' x 40' to \$3,200 40' x 80' starter kit. This price includes wood boards, brackets, rink liner and installation. We are able to customize your rink to any size that fits your yard or budget.

Q: Does my yard need to be perfectly level?

A: No, most yards are not level. Maximum grade differential is 14" without extra support.

Q: When is the best time to install the rink?

A: The framework needs to be installed by November, before the ground begins to freeze. Liner and flooding occurs when the temperatures drop to a consistent freezing point.

Q: What kind of maintenance is involved?

A: Treat the rink like you would your sidewalk and driveway; as soon as the snow stops, it needs to be shoveled. Keeping your rink shoveled and clean will ensure beautiful ice!

Q: What will this do to my grass?

A: Grass goes dormant in the fall. The liner actually will protect your grass from being saturated with moisture from the snow. In most cases it will be greener and healthier the following year.

Q: What happens when spring comes?

A: You will need to store the boards and brackets indoors for the following year. Most customers store it in their shed. The liner is recyclable.
